## OUR PACKAGING PROPOSAL

- Single thermo roll with barcode label in black and white or coloured (up to 5 colours).
- Harmonica.

## RECOMMENDATIONS

It is good practice to use the product within 6 months of purchase, as the resistance to unwinding increases with time. The material must be correctly stored in the appropriate packaging, in a dry place protected from light, at a temperature between 15 °C and 25 °C and humidity around 50 %. If stored under different conditions, the product must be repacked. Removal of the tape after application must be done slowly without tearing. Before use, always check the condition and cleanliness of the surface to which the product will be applied. Euromask accepts no liability for direct or indirect damage resulting from improper use of the material. Under normal conditions the tape is non-toxic and not approved for medical use

The above values may be changed at any time due to production requirements or technical updates.
